

Real-Time SPC™ June 24 2026

Release Date: 24 June 2026

New Features in Real-Time SPC, June 24 2026

Global Localization Support

Real-Time SPC now offers a multi-language experience with regional settings and localized Help content.

Use the application in your preferred language, enabling teams across regions to collaborate more effectively and reduce misunderstandings. Configure date formats, number styles, and measurement units to match local standards and improve data clarity. Access translated Help documentation to quickly find answers, learn features, and stay productive without language barriers.

Smart Application Search

Instantly search across the entire application and jump directly to products, processes, measures, dashboards, configurations, and more from one convenient location.

Find what you need faster and get where you want to go with fewer clicks, helping you spend less time navigating and more time focusing on your work.
